#### **DETAILED ACTION**

#### Response to Arguments

1. Applicant's arguments filed 6/16/04 have been fully considered but they are not persuasive.

2. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a honeycomb structure) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claim18, 19, 22-26, 28, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 3,560,694 to White.
- 5. White teaches a method and apparatus for drying printed media 7 comprising receiving the media 7 through an input opening 6 in a resonant cavity, drying the media 7 using an electric field formed from source 9, frequency modulating the electric field with waveguide 11, forcing air against the media using blowers 8, attenuating the electric field with structure 12, and passing the media 7 through exit opening 6 coupled

Art Unit: 3749

with exit rollers. Note column 2, lines 38-72; column 3, line 72- column 4, line 7 and Figure 1.

### Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over White as applied to claim 18 above, and further in view of Kasevich.
- 8. White does not teach an article of manufacture comprising a storage medium readable by a computer to execute his drying method. Kasevich teaches a similar method comprising electromagnetic treatment wherein the instructions for carrying out the method are stored on a disk to be read by a computer. Note column 8, lines 46-57. As Kasevich teaches that storing information on a disk will enable automatic and efficient operation, it would have been obvious to one of ordinary skill in the art to modify the method of White with the step of storing information on a disk, as taught by Kasevich.
- 9. Claims 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over White as applied to claim 18 above, and further in view of Scalese et al.
- 10. White does not teach stubs to attenuate the electric field. However, Scalese et al. teaches a similar attenuating method and apparatus comprising stubs 222. Note column 17, lines 38-47 and Figure 19. As Scalese et al. teaches that stubs lead to

more precise attenuation, it would have been obvious to one of ordinary skill in the art to modify the attenuating method and apparatus of White with the stubs of Scalese et al. Regarding claim 21, Scalese et al. does not teach stubs having a dimension equal to one quarter the wavelength of the electromagnetic signal. However, he does teach that it is know to vary the dimension of an attenuating stub to achieve desired attenuation. Therefore, such a limitation would have been obvious to one of ordinary skill in the art since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

## Allowable Subject Matter

11. Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kathryn S. O'Malley whose telephone number is (703)308-2844. The examiner can normally be reached on M-F (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ira Lazarus can be reached on (703)308-1935. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
